Toronto Harbour: Enlargement of Contract.

AUDIT OFFICE, OTTAWA, May 15, 1912.

SIR,—We have just received a copy of an Order in Council of April 13, 1912, extending the contract of R. Weddell & Co. at Toronto Western Entrance, by adding 1,800 feet of revetment wall and 160,000 cubic yards of dredging, for a sum of $163,217.24.

The main contract of 1908 was for $495,000, on which the Progress Estimate of November 30, 1911, reached $492,819.04, so that the original work was practically completed at that time.

The Order in Council of May 15, 1912, contains no statement that the new wall and dredging are so closely connected with the $495,000 contract that it would have been impossible to handle them separately.

Please let us know what were the difficulties in the way of inviting public competition for the new contract.

As far as we understand the matter at present, the 1,800 feet of revetment wall and the 160,000 cubic yards of dredging should have been advertised.

I am, sir, your obedient servant,

FREDERICK HAYTER, *for A.G.*

The Deputy Minister of Public Works.

DISTRICT ENGINEER'S OFFICE, TORONTO, May 29, 1912.

SIR,—I respectfully acknowledge the receipt of your letter No. 1702 dated 20th inst., enclosing a letter from Mr. Frederick Hayter, for the Auditor General, under date 15th inst., addressed to the Deputy Minister, regarding the extension of the contract of R. Weddell & Co., at Toronto Western entrance, and you ask me to report on this matter as soon as possible.

With reference to the above, I would say, I have carefully read Mr. Hayter's letter in which he asks what the difficulties were in the way of inviting public competition for the new contract, and beg to report as follows :—

This work is an extension of the original contract for the new Western channel and is to be performed at pro rata prices of the contract which amounts to about $3.63 per cubic yard for cribwork substructure and concrete superstructure, which is an extremely reasonable figure and much lower than we are having similar work performed that has been open to competition, and the Contractor could not do the work at these prices were it not for the fact that he has all his plant and equipment right on the ground. The estimated cost of similar work is $5 per cubic yard.

I would also say that the original contract is not yet completed and the work has not been taken off the Contractor's hands by the Department.

The Department will save thousands of dollars by the present arrangement, and I make this statement only after the most careful investigation and computation. I return herewith, correspondence sent me.

Yours obediently,

J. G. SING, *District Engineer.*

The Chief Engineer Public Works Department, Ottawa.

CHIEF ENGINEER'S OFFICE, OTTAWA, May 29, 1912

SIR,—In compliance with the instructions in the attached file, I beg to transmit herewith a report from Mr. District Engineer J. G. Sing, regarding the extension of the contract of the R. Weddell & Company at Toronto western entrance.

Mr. Sing states that this work is an extension of the original contract for the new Western Channel, and is to be performed at pro rata prices of the contract which amount to about $3.63 per cubic yard for crib work substructure and concrete superstructure. The District Engineer further states that, as the estimated cost of similar work is $5 per cubic yard, the Department would save thousands of dollars by the existing arrangements with R. Weddell & Company.

I concur in what Mr. Sing reports regarding the reasonableness of the price of $3 63 per cubic yard for crib work substructure and concrete superstructure. As the final estimate has not yet been returned for the main contract or the work taken off the contractor's hands, I consider that the work in question is only an extension and that the Department would not have received so reasonable a price if the work had been advertised by public tender.

I am, sir, your obedient servant,

EUGENE D. LAFLEUR, *Chief Engineer.*

The Deputy Minister D. P. W.

Temporary Employees not charged to Salary Votes.

AUDIT OFFICE, OTTAWA, MAY 1, 1912.

SIR,—Let me call your attention to Sec. 100 of Cap. 17 of the Revised Statutes of Canada, namely, "Temporary employees shall be paid out of moneys specially voted by Parliament for the purpose."

We notice in the year 1911-12, an Assistant Draftsman named J. E. Larochelle, paid at the rate of $1,300 for services in the Dredging Branch of the Public Works Department, and charged to three votes for "dredging."

Please transfer his salary from the Dredging Votes to whatever Salary Vote is appropriate and available.

Similarly for any other temporary employees charged otherwise than on Salary Votes: both for 1911-12 and subsequently.

I am, sir, your obedient servant,

FREDERICK HAYTER, *for A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPT., OTTAWA, MAY 7, 1912.

SIR,—I beg to acknowledge receipt of your letter of May 1, calling attention to Section 100, of Chapter 17 of the Revised Statutes of Canada, namely, "Temporary employees shall be paid out of moneys specially voted by Parliament for the purpose," and asking that Mr. J. E. Larochelle's salary be transferred from the dredging votes to whatever salary vote is appropriate and available, and that the same course be pursued with regard to the salaries of any other temporary employees charged otherwise than to salary votes.

This matter has been referred to the Accountant for attention.

I am, Sir, Your obedient servant,

R. C. DESROCHERS, SECRETARY.

The Auditor General.

Note by A. G.: These items were subsequently transferred and charged to Salary Votes.

Dining Saloon Expenses: S.S. "Speedy."

AUDIT OFFICE, OTTAWA, MAY 28, 1912.

SIR,—Let me call your attention to two vouchers in favour of Captain Ludger Legendre of the Steamer *Speedy*, which include the following items:

5045: July 1-31, 1911: Dining Saloon, at $1 per day.... ....$82.
6868: Aug. 1-31, 1911: Dining Saloon, at $1 per day.... .... 23.

Please let us have a list showing the names of the people for whom this expense was incurred, and the amount for each person.

I am, sir, your obedient servant,

FREDERICK HAYTER, *for A.G.*

The Deputy Minister, Public Works.

Re Telegraph Revenues.

AUDIT OFFICE, OTTAWA, March 27, 1912.

SIR,—Statement No. 9, received February 2nd was the last Telegraph Return received at this office.

No return later than September has been received from some of the districts of British Columbia.

Returns from the other districts for November are not all to hand, and but four returns for December.

Deposits come to hand more promptly than the returns, but not as promptly as they should.

Your attention is requested.

I am, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, April 10, 1912.

SIR—Referring to your favour of the 27th ult., I now have the honour to enclose you memorandum of explanation from the General Superintendent of Telegraphs in regard to the Traffic returns from Government Telegraph and Telephone Lines.

Yours truly,

J. B. HUNTER, *D.M. P.W.*

The Auditor General.

Memorandum for the Deputy Minister of Public Works.

Having reference to your note of enquiry regarding the advice received from the Office of the Auditor General concerning the tardiness of presentation of traffic returns. The delay this time is found to be due to congestion of work here at Ottawa. Mr. Burgess has given me the enclosed list (in duplicate for your convenience) of Returns received which shows the whole well up to date. Mr. Bray has been away for some time engaged with the lately established agencies in the Temiskaming District but is returning this week and will help in getting the arrears of returns forwarded.

D. H. KEELEY, *General Superintendent.*

OTTAWA, April 3, 1912.

Re Wharfs and Piers not transferred to Department of Marine and Fisheries.

AUDIT OEFICE, OTTAWA, February 22, 1912.

SIR,—I wish to call your attention to the large number of wharfs built by your Department, which have not been transferred to the Department of Marine and Fisheries, and on which no fees are collected.

On July 7, 1910, your Deputy furnished a list of 126 wharfs completed in 1907-1908, and 1909, which had not been transferred. In addition, there are the wharfs previously built and not transferred, and those built in 1910 and 1911; probably 200 or more wharfs in all.

For years past I have been calling the attention of your Department to this matter, and in November, 1907, submitted the matter to the Treasury Board.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

Honourable F. D. MONK,
Minister of Public Works.

PUBLIC WORKS DEPARTMENT, OTTAWA, Feb. 24, 1912.

DEAR SIR,—I have received your letter of the 22nd instant, *re* wharves and piers not transferred to the Department of Marine and Fisheries, and thank you for the information.

I have referred the matter to the Deputy Minister for careful attention.

Yours very truly,

F. D. MONK.

The Auditor-General.

DEPARTMENT OF PUBLIC WORKS, OTTAWA, June 5, 1912.

SIR,—I duly received yours of the 31st ult., with reference to Souris, P. E. I. wharf. I did not know before that you drew any line that only wharves, where fees were collected or should be collected, should be transferred to the Marine Department, and unremunerative works left in the hands of the Public Works Department. According to my reading of the Act, Chapter 112, R. S. C., 1906, Section 4, it seems to me that all wharves, piers and breakwaters—whether remunerative or not—are to be transferred to the control of the Minister of Marine and Fisheries. Thereafter, it would appear to be a matter for the Minister of that Dapartment to say whether such and such a work shall, or shall not, be subject to tolls; and I am replying in that sense to the Department's letter of the 18th ultimo.

With regard to your letter of February 22nd last, I may say that as this is entirely a matter of policy, I made a memorandum to the Honourable the Minister of Public Works, copy of which I enclose for your information.

I am, sir, your obedient servant,

J. B. HUNTER, *D. M. P. W.*

The Auditor General.

NOTE.—See correspondence page V—433, audit report 1910–11.

APRIL 25, 1912.

MEMORANDUM TO THE MINISTER:—

With reference to attached letter from the Auditor General, under date of Feb. 22, 1912, concerning a large number of wharves constructed by the Department of Public Works which have not been transferred to the Department of Marine and Fisheries, and on which no fees are collected, I beg to say that under section 4, of the Government Harbours and Piers Act, Chapter 112, R.S.C., 1906, which reads as follows:—

> '4. Excepting such wharfs, piers and breakwaters as are on or connected with canals, the use, maintenance and ordinary repairs of all harbours, wharfs, piers and breakwaters constructed or completed at the expense of Canada, or

in any way the property of Canada, and the making and enforcing of regulations concerning such use, maintenance and ordinary repairs, and the collection of tolls and dues for such use, shall be under the control and management of the Minister.'

All harbour and river works constructed by the Department of Public Works are required to be transferred, upon completion, to the Department of Marine and Fisheries for administrative purposes.

As the Auditor states, however, this Act—since its enactment—has been honoured more in the breach than in the observance. A statement prepared by the Department of Marine and Fisheries, under date of November 28, 1911, shows that of a total of 1,131 wharves, breakwaters and other works, which have been constructed, only 325 have been placed under the jurisdiction of the Marine and Fisheries Department. The statement referred to, for convenience of reference, is given hereunder :—

There are a number of reasons why this Act has never fully been lived up to ; the chief being the dislike of the public to pay tolls for the use of a Government work, especially in the smaller farming and fishing communities.

When a wharf is transferred to the control of the Department of Marine and Fisheries, a wharfinger is appointed and tolls are thereafter collected. In some cases, where transfer was made, such a storm of protest was raised that the transfer was subsequently cancelled. In other cases, steamboat and forwarding companies would have their vessels call at a wharf for the accommodation of the public : but when dues were levied, they would refuse and give notice that they would make some other wharf at some distance, where tolls were not collected, their port of call.

Moreover, the wharfinger is authorized to make only ordinary and minor repairs, and in practice the repairs made are very minor indeed, the result being that a wharf not being kept up and not regularly inspected by an Engineer of this Department—as it was no longer his business to do so, having once completed it,—is allowed to gradually run down until its condition is such that expensive and costly repairs—in some cases, practically re-construction,—become necessary, which might to a great extent have been avoided if the work had been properly maintained.

In addition, the Department of Marine and Fisheries did not care to accept the transfer of other than revenue-bearing works, namely—breakwaters, groynes, training piers and the like.

The above are some of the reasons which have led to the present state of affairs. The Auditor General has, as stated in his letter—finding his protest ineffectual—appealed to Treasury Board to compel the transfer of these works, but Treasury Board, no doubt moved by some of the reasons above given, has never seen fit to take action in the matter.

In my opinion, the Act should be amended, and the Department of Marine and Fisheries requested to indicate what wharves it is disposed to retain under its jurisdic-

tion and re-transfer the others to the Department of Public Works. There are only a few of the larger works which produce a revenue of any size; and the revenue collected —even including that obtained from the larger wharves—is comparatively insignificant.

In any event, I do not think that wharves, which are used by the smaller class of trading vessels bearing cargo to or from a farming or fishing community, or doing a local trade only, should be subject to tolls. It is merely a source of annoyance and a cause of grievance to the users of the wharf and the revenue derived after the wharfinger is paid his commission is a mere bagatelle. Take for instance, the farmer, who is miles away from any railway facilities, shipping a few head of cattle or a few bags of potatoes over the local wharf; it can well be imagined how he resents paying a few cents a bag, or five or ten cents per head, for the privilege.

I beg to submit, for your information, a statement showing the dues collected by the Department of Marine and Fisheries during the years 1908, 1909, 1910 and 1911, on wharves, &c., transferred from the Department of Public Works to that Department. In this statement, the Provinces are given separately. It will be noticed that a few wharves only, in each Province, contributed the major portion of the revenue collected. It will also be observed that of the wharves transferred to the Department of Marine and Fisheries, that Department has been gradually reducing—year by year—the number of wharves on which tolls are levied, which bears out the statement I made above with reference to wharves in farming and fishing communities being subjected to this tax. Doubtless, protest, similar to those received by the Department of Public Works against a wharf being transferred in the first place, have been made to the Marine and Fisheries Department, after it had been transferred, with the result that the tolls were dropped and the wharf made free. It would be much better if wharves situated only in the more important harbours, outside of the harbours of Toronto, Quebec, Montreal, Halifax, Pictou and St. John, N.B., which are excluded from the application of this Act, were left with the Department of Marine and Fisheries and all others transferred back to the Department of Public Works, and made free. Some responsible person in the neighbourhood could then be put in charge as overseer at a small yearly allowance, who would see that no improper use was made of the wharf, and that it was not wilfully damaged; and who would report at regular intervals on its condition to the District Engineer of this Department.

The question raised by the Auditor General is, as you will see, one of policy, which will have to be dealt with by the Government.

J. B. HUNTER, *D.M.P.W.*

AUDITOR GENERAL'S REPORT
1911-12

PART W

RAILWAYS AND CANALS DEPARTMENT

DETAILS OF EXPENDITURE AND REVENUE

1911-12: Railways and Canals: Summary of Expenditure.	Page in Part W.	$ cts.	$ cts.

Holland River: Changes in Specification.

AUDIT OFFICE, OTTAWA, December 12, 1911.

SIR,—Let me acknowledge receipt of your Application No. 423, for $43,410.00 in favor of the York Construction Co., being Estimate No. 35 to Sept. 30 on Section Two of the Holland River Division of the Trent Canal.

The Progress-Estimate contains two new items as follows:

7A: Body Concrete in Locks 1, 2, 3, and Dams 1, 2: 27,852 cubic yards at $4.90.....	$136,474 80
8A: Face Concrete in Locks 1, 2, 3, and Dams 1, 2: 1,105 cubic yards at $9.00.....	9,945 00

These items carry the initials of the Chief Engineer, "W. A. B."

Corresponding deductions are made in Items 7 & 8, thus

7: Body Concrete: 24,452 c. y. at $3.90 (Deducted).....	95,362 80
8: Face Concrete: 880 c. y. at $8 (Deducted)...	7,040 00

The increase owing to re-classification of work previously measured is $25,332.00.

The only explanation given in support of this change is a note from Chief Engineer Bowden to the Auditing-Engineer dated Oct. 14, 1911, which reads: "Under the authority of Clause 3 of the Contract, I have increased the price of Body and Face Concrete in Locks 1, 2 and 3, and Dams 1 and 2, one dollar a cubic yard, on the contract for the York Construction Co., for Section 2, Holland River Division. (Sgd) W. A. Bowden, Chief Engineer."

Please describe the change in the specification, for which the increased price is given. The new rates might be certified "Fair and just".

I am, Sir, your obedient servant,

The Deputy Minister,
Railways and Canals.

FREDERICK HAYTER,
for *A.G.*

CHIEF ENGINEER'S OFFICE, R. & C. DEPT., December 13, 1911.

SIR,—With reference to the new items in the Progress Estimates of the York Construction Company, for Section No. 2 of the Holland River Division, concerning which Mr. Hayter of the Auditor General's office requests an explanation, I beg to submit the following.

The design on which the schedule prices were based contemplated locks similar to those employed on the Ontario-Rice Lake Division, the dams consisting of one sluiceway and a long spillway. For purposes of more economical use and control of water, as well as a large saving in material, changes were made in the design after the contractors had started work.

The schedule prices for body and face concrete were based upon locks with chamber 175 feet long, having unbroken straight walls between the usual two pairs of lock gates. These locks were to be filled through culverts in the sidewalls, which necessitated very thick and massive sidewalls. The thick sidewalls and the long unbroken lines of the face walls combined to render the form work very simple; and in recognition of this the contractors tendered the unusual price of $3.90 per cubic yard for body concrete, and $8.00 per cubic yard for face concrete.

The locks as constructed were reduced in length to 142 feet between end gates, an additional pair of gates was provided for at an intermediate point, together with an additional valve-gate between the lock wall extensions. This latter gate is hinged on the bottom of the lock, being submerged for the passage of vessels, but revolving into a vertical plane across the lock to shut off leakage. The filling of the lock chamber in the revised design is through valves in the gates, which permitted a substantial reduction in the thickness of the walls.

As summarized, with some exaggeration, by the contractors, "The original lock had two paid off recesses with a long stretch of straight wall between, the walls being of heavy section. The lock as built contains four pairs of recesses with practically no straight wall, the wall sections being much lighter than originally contemplated."

The dams adjoining the locks were also changed except in the case of Dam No. 3; the work upon which was well advanced when the change was decided upon. The original design contemplated the construction of one stoplog sluiceway and a simple straight wall spillway of 100 feet in length. At Dams 2 and 3, the spillway was omitted, and two additional stoplog sluices substituted.

The effect of these changes was to increase the cost of the work, by a direct increase in the cost of form work, and by an indirect increase in the cost of depositing concrete owing to inability on the part of the carpenters to keep form work in advance of the mixing and depositing plant.

That the change in design was of a nature to increase the unit cost of concrete was evident from the first, but the determination of the amount by which the cost was increased could best be done after observing the work of construction.

The matter was finally brought to an issue by the Contractors' solicitor, in February of this year, who made a claim for an advance of $3.00 per cubic yard upon all concrete laid in the three locks and three dams and entrance piers.

After full enquiry and careful consideration, I have allowed an advance of $1.00 per cubic yard upon the concrete in the three locks and two dams,—no allowance being made for entrance piers or other concrete work as it did not appear that the changes in these cases were of a nature to affect classification.

I am, Sir, your obedient servant,

W. A. BOWDEN,
Chief Engineer.

The Deputy Minister,
Railways and Canals.

Holland River: Earth washed into Canal.

AUDIT OFFICE, OTTAWA, January 3, 1912.

SIR,—Let me acknowledge receipt of your Application No. 497 for $37,120.00 in favor of the York Construction Co., being Estimate No. 36 to Nov. 30, 1911, on Section Two of the Holland River Division of the Trent Canal.

NEW ITEMS OF EXTRAS.

The Estimate includes new items of extra work, amounting to $3,886.17. Please send the usual written orders for these, which described the service to be performed in each case.

EXCAVATING EARTH WASHED INTO CANAL.

There are three allowances of this kind, namely:

Claim 11: Excavating wash-in at Lock 3: June 1-Aug. 26, 1909.....	$1,221 25
Claim 13: Excavating in Dam No. 3, account of wash-in: 3400 c. y. at 50c.....	1,700 00
Claim No. 35: Excavation washed into Canal Prism below Dam 3: 6,000 c. y. at 50c..	3,000 00

Section 15 of the Contract reads: "The Contractor shall be at the risk of, and shall bear all loss or damage whatsoever, from whatsoever cause arising, which may occur to the works or any part thereof, until the same be fully and finally completed and delivered up to, and accepted by the Minister; and if any such loss or damage occur before such final completion, delivery and acceptance, the Contractor shall immediately, at his own expense, repair, restore and re-execute the work so damaged."

What are the reasons for considering that the "Wash-in" does not come under the heading of Repairs and Restorations for which the Contractor is liable under Section 15 of the Contract?

I am, Sir, your obedient servant,

FREDERICK HAYTER,
for *A.G.*

The Deputy Minister,
Railways and Canals.

CHIEF ENGINEER'S OFFICE, OTTAWA, January 10, 1912.

SIR,—With reference to the request made by Mr. Hayter in his letter of January 3rd, for the written orders for certain new items of extras included in Estimate No. 36 in favour of the York Construction Co., contractors for Section No. 2 of the Holland River Division; and also for an explanation of why certain items covering the excavation of earth washed into canal have been returned as an extra and not regarded as coming under the heading of Repairs and Restorations for which the Contractor is liable, I beg to submit the following:

The new items of extras cover extra works which in general were not ordered in advance in writing. Many of the claims are incidental to changes in design for which the Contractors were furnished revised plans; others were ordered verbally by the engineers. I attach hereto a memorandum dealing with each of the items, which sets out the nature of the work performed, the details of the cost being set out in the accounts accompanying the estimate.

These accounts, together with many others, were rendered by the Contractors from time to time, but as many of the claims filed did not appear to be well founded, and others contained detail items which were not considered proper charges, the whole of them were held by the Resident Engineer for subsequent consideration by the Chief Engineer.

In February last, all the claims for work done up to the end of the year 1910 were submitted by the Contractors' solicitors, and, after investigation and study by the Superintending Engineer and Resident Engineer, I had these Engineers meet the contractors in my office on September 15th and 16th, when each claim was subjected to careful enquiry. As a result of this enquiry, certain claims were allowed in whole or in part, and the accounts now included in Estimate No. 36 are revised in accordance with our determination of their merits on that occasion.

The items for excavation of earth washed into canal have their origin in an unprecedented flood which occurred in February, 1909, during which the waters not only overflowed the natural banks of the Holland River, but completely inundated the low lands in the valley through which the river flows. Much damage to works was caused by this flood, and the amount of excavation was increased by reason of the deposition of material at points where the flow velocity was reduced.

The Contractors filed claims connected with flood effects amounting to $22,239 of which $17,705.76 arose from the flood mentioned above, (Claims 8, 9, 10, 11, 12, 13, 31, 35 and 37). The question of the disposal of these claims was attended with great difficulty. The course adopted being somewhat in the nature of a compromise, was to reject all claims based upon actual damage to works and cost of repairs, as well as all unwatering claims, and to consider the earth deposited in the lock pit, dam pit and lower reach (exclusive of bank slides) as extra work, inasmuch as no one knew definitely where all this material originated.

In November, 1908, the excavation of the prism of the canal above Lock No. 3 had been well advanced; the prism below Lock No. 3 had been partially excavated; an offtake ditch approximately parallelling the canal near Dam No. 3 being part of the permanent works had been completed; the sites of Lock and Dam 3 were excavated and the piles in the foundation of the lock and dam were driven, ready for the concrete superstructure. During November, preparations were well under way for the construction of the concrete superstructure when the Superintending Engineer wrote the contractors forbidding the placing of concrete at this structure, owing to the lateness of the season. Thus the excavated pits were left in a condition not contemplated by the contractors in arranging their work to pass through the hazard of spring floods. While the Engineer had authority to stop the concrete work without creating liability for claims for delay, it does not seem that other damages resulting from the exercise of this authority should be repudiated. As a matter of fact, concrete can safely, and frequently is, deposited throughout the winter.

Again, after the completion of the offtake ditch, changes made in the design of the lock and dam had the effect of reducing the width of the narrow strip which separated the dam pit from the offtake ditch.

While it is probable that the great flood which occurred would have caused damage in any case, there can be no doubt that the extent of the damages was increased by the above circumstances. Had the concrete work been allowed to proceed the canal prism would have taken care of a portion of the flow, and there would have been no cross currents to bring in material. The flood caused a breach to open between the offtake ditch and the dam pit, at the point where the original width had been reduced by changes in design, which led to the deposit of a large amount of material in the lock and dam pits and in the reach below the dam, besides doing damage to offtake ditch and the slopes of the canal prism.

Another point of view which was pressed by the Contractors was the differentiation between damage to works and structures, and the addition of work to be done through natural agencies. In time of flood, it is not unusual for relatively small streams to bring down considerable quantites of sand and gravel from the hills, the same being deposited in the bottom of the valley. Such materials, deposited on the natural surface of the ground within canal limits, but remote from the part upon which construction has commenced, cannot be regarded as other than additional work. In so far as the excavation of the material is concerned, it is not apparent why the place of deposit should affect the situation when there has been no contributory negligence on the part of the contractors.

A further consideration, not legally admissible under the contract, but bearing upon the equity of the case, is that of the hardship imposed upon a contractor in requiring of him the protection of a great extent of vulnerable construction work without adequate appropriation of funds for their prosecution.

The unit prices returned for the excavation of the part of the washed-in material included in the estimate was, in the case of Claims 11 and 13, determined by our force account records, without any unwatering or other allowance. In the case of Claim 35, the rate returned is considered fair and reasonable for the service.

It is regrettable that so many cases have arisen in which the provisions of the contract, that written orders shall be given for extra work, have not been observed. I shall at once take steps to remedy this defect by instructions to our engineers and warnings to the contractors.

I am, Sir, your obedient servant,

W. A. BOWDEN, Chief Engineer.

The Deputy Minister, Railways and Canals.

Railway Grade Crossing Fund: Two Crossings at Barrie.

AUDIT OFFICE, OTTAWA, April 20, 1912.

SIR,—I have to acknowledge the receipt of your application No. 676 in favour of the Grand Trunk Railway System for $4,833.36, chargeable to "The Railway Grade Crossing Fund". This payment is asked for as being forty per cent of $12,083.40 the total cost of the protection provided by the said company at Raike's and Woodland crossings north of Barrie, Ont.

With reference to payments to be made from "The Railway Grade Crossing Fund" the Railway Act states that "the amount to be payable shall not in the case of any one crossing exceed twenty per cent of the cost of the actual construction work." Please explain why forty per cent of the cost is asked for in the present instance.

This office would like to be supplied with certified copies of the plans relating to this matter.

I am, Sir, your obedient servant,

FREDERICK HAYTER, for A.G.

The Deputy Minister, Railways and Canals.

RAILWAYS AND CANALS DEPT., OTTAWA, April 30th, 1912.

DEAR SIR,—Referring to your letter of April 20th, 1912, relative to account in favour of the Grand Trunk Railway for $4,833.36, chargeable to "Grade Crossing Fund".

The expenditure is for the protection of two crossings, and not one as referred to in your letter, and this therefore falls within subsection 5 of section 1 of 8-9 Edward VII, chapter 32.

Yours truly,

A. W. CAMPBELL, Deputy Minister.

Frederick Hayter. Esq., Audit Office, Ottawa.

1—26w

AUDIT OFFICE, OTTAWA, May 14th, 1912.

SIR,—In further discussion of your Application No. 676 for $4,833.36, in favor of the Grand Trunk Railway, being 40 per cent on $12,083.40, the cost of constructing an Overhead Bridge, and Diversion of Roadway, at Raike's Crossing and Woodland Crossing, north of Barrie in the township of Oro:

Since the Railway Company's account is the only information supplied to this office, our understanding of the case is not as complete as is that of the Department, to whom all the details are available. We therefore find it difficult to be sure that the intention of the Act is carried out, namely, to repay to the Company one-fifth of the cost of the actual construction-work. The plans asked for in a previous letter would (we think) be an assistance in this direction.

At present, it appears to us that a settlement in closer accordance with the Act might be arrived at by supposing the two works to have been constructed at different times.

For instance, reckon up the cost of the Raike's Crossing, as it would have been built independently of the other, for a separate complete and sufficient work; and allow one-fifth of this to the Company.

Then calculate the additional cost of the Woodland Crossing as if it had been added subsequently. Since the previous work has been settled for already, we now have only one-fifth of the new work to pay.

The simultaneous construction would of course be somewhat cheaper.

If this proposition is not germane to the facts, its inappropriateness will probably be demonstrated by the plans.

I am, Sir, your obedient servant

FREDERICK HAYTER, for A.G.

The Deputy Minister, Railways and Canals.

NOTE.—This sum has not yet been paid. Nov. 19, 1912. F. H.

Transcontinental Railway: Contractors' Plant on Extra Work.

CHIEF ENGINEER'S OFFICE, OTTAWA, Nov. 11th, 1911.

DEAR SIR,—I herewith send you copy of a letter I have received from Acting District Engineer Macfarlane, under date of the 8th inst., requesting authority to lift two sidings and a wye not now in use on that District.

For your information, I may say that, owing to your rule that no mechanical appliances can be paid for in an extra work order, it is costing us from four to six times as much as it should to lift these sidings by hand labor.

I would therefore, request your authority, in the interests of economy and common sense, to allow me to pay a reasonable rate for a derrick car to take up any tracks that have been laid by order of the Commissioners and at their expense. Of course, we do not pay for the removal of wyes or any sidings that were laid by the contractor for his own use or convenience.

An early reply will greatly oblige.

Yours truly,

GORDON GRANT,
Chief Engineer.

Frederick Hayter, Esq.,
Audit Office, Ottawa.

St. John, N. B., November 24, 1911.

Dear Sir,—Referring to conversation I had with you in your office when in Ottawa last week, re the use of Plant, especially in connection with the taking up of track. My recollection is that you stated that on District "D" when Mr. Balkam took charge he discovered that Fauquier Bros. were taking up track by hand, instead of using a derrick car and other plant, because they could not get any compensation for the use of same under the ruling, as I understood, of the Auditor General. This has been recalled to my mind when in conversation with Mr. Longley this morning he stated that in arranging with Kitchen about the taking up of spur connecting our line with the C. P. R., when he asked him what it would probably cost in order that he might ask for Extra Work Order, Mr. Kitchen stated that he was going to take this up by hand, as it were, as he could not get any pay for the use of locomotive, cars, &c.

You will, of course, understand that we have had to be governed by the Circular which you issued on 21st February 1910 stating that we include under the terms of Tools, Plant, Superintendence, &c., in which all the appliances a Contractor is likely to have for ordinary construction work, is included or rather excluded from payment, so that he can only receive 10% on the actual wages paid.

If you have got this matter arranged with the Auditor General, which was my impression from our conversation that day, will you kindly give me instructions to that effect.

Yours very truly,

C. O. FOSS, District Engineer.

Gordon Grant, Esq., C.E.,
Chief Engineer, N.T.R.

Chief Engineer's Office, Ottawa, December 6th, 1911.

Dear Sir,—With reference to my letter to you of Nov. 11th., I herewith send you copy of a letter received from District Engineer Foss.

Would you please say if you are still of opinion that the public interest is better served by doing work by hand, than by machinery, even when the hand work is much more costly to the Commissioners, than if machinery is used.

Yours truly,

GORDON GRANT, Chief Engineer.

Frederick Hayter, Esq.,
Audit Office, Ottawa.

Audit Office, Ottawa, December 11th, 1911.

Dear Mr. Grant,—Let me acknowledge receipt of your note calling attention to the words "Contractor's Plant" in Section 35 of the General Contract and explaining that a strictly literal interpretation of these words is causing hindrance to the work.

Section 35 provides that Extras may be paid for at actual prices for labor and material; plus 10 per cent on the cost of labor and material, "for the use of tools, Contractor's plant, superintendence and profit".

It is objected by the Contractors that, for the larger and special appliances, 10 per cent on wages does not even provide a fair rent-income on their cost; and the Contractors will not use such appliances under the Orders for Extras as at present issued.

We are permitted, I think, to construe the words "Contractor's Plant" in such a way as will give a workable meaning to the whole of Section 35.

The phrase might perhaps be taken to mean only such minor plant as would be indispensable to an ordinary contractor doing general business in a somewhat restricted way.

Expensive machinery, whose main object is to save time and wages on large contract-items, cannot have been intended to be covered by Section 35's method of calculating remuneration for small orders of Extra Work; since, the more costly the labor-saving appliances, the less will be the labor, and the less the 10 per cent remuneration.

Any more literal interpretation than this would render uncertain to a contractor the income from his most high-priced investments; as they might at any time be taken off from profitable contract-items, to do Extra Work Orders at a nominal return.

If some such reasonable understanding is elaborated and certified by yourself as Chief Engineer, the Audit Office will not object to its acceptance.

The Grand Trunk Pacific Railway Company might be asked to concur.

I am, Sir, your obedient servant,

FREDERICK HAYTER, for A.G.

Gordon Grant, Esq., C.E.,
Chief Engineer,
Transcontinental Railway.

———

December 22nd, 1911.

DEAR SIR,—I beg to acknowledge receipt of your favor of the 12th inst., referring to rental of machinery and unusual plant on work done by force account.

I take it that you are referring to conditions where you order a contractor to do certain work on actual cost plus 10% basis, that your contractors contend that the 10% added to actual cost is only contemplated to compensate them for supervision, use of tools and other ordinary appliances, and that they desire a per diem rate for any locomotives, pile drivers, steam shovels, steam pumps, steam hoists, engines, railroad cars and such like plant, which it may be necessary to use in the execution of this particular piece of work. If my interpretation of your letter is correct, I believe the contractors are right in their claim, as the 10% added to the actual cost is only contemplated to cover supervision, hand tools, small engines, etc., ordinary appliances on the work. Steam shovels, locomotive engines and plant of that kind should earn a rental.

Yours truly,

B. B. KELLIHER,
Chief Engineer, G.T.P.Ry.

Mr. Gordon Grant,
Chief Engineer, Transc. Rly.,
Ottawa, Ont.

CHIEF ENGINEER'S OFFICE, OTTAWA, December 26, 1911.

DEAR SIR,—With reference to yours of the 11th inst., *re* payment for contractors' plant, other than hand tools, &c., when used for the purpose of doing work economically on the line.

In accordance with your wish, I wrote the Chief Engineer of the Grand Trunk Pacific Railway Co. for his views on this matter, and herewith hand you copy of his letter, which I consider entirely satisfactory.

Will you please, therefore, say if Mr. Kelliher's letter is satisfactory to you; if so, I shall now take the matter up with the Commissioners, with a view of having it settled. An early answer will oblige, as I have several jobs waiting a decision on this question before I authorize the District Engineer to go ahead with the work.

Yours truly,

GORDON GRANT,
Chief Engineer.

Frederick Hayter, Esq.,
Audit Office, Ottawa.

AUDIT OFFICE, OTTAWA, December 29, 1911.

DEAR MR. GRANT,—*Rè* payment for Contractors' plant (other than hand tools, etc.), when used for the purpose of doing work economically along the line.

You enclose a copy of a letter from Chief Engineer Kelliher of the Grand Trunk Pacific Railway Company, dated Dec. 22.

Mr. Kelliher's letter will be perfectly satisfactory to this office, if his signature is binding on the G. T. P. Ry. Company.

Yours sincerely,

FREDERICK HAYTER, for A.G.

Gordon Grant, Esq., C.E.,
Chief Engineer,
Transcontinental Ry.
